PERSONALITY-MEDICINE MODEL FOR HOMEOPATHIC MEDICINE USING FUZZY ASSOCIATIVE MEMORIES

W.B.Vasantha Kandasamy and R.Kamala

In this paper we study the personality - Medicine model of a patient for Homeopathic medicines using Fuzzy Associative Memories (FAMs). As homeopathic medicines are given to persons largely depending on their personal traits we felt fuzzy theory in general and FAMs in particular may help to pick up a proper medicine for a particular disease and for a specific patient.
